

wek-tec e.K.
and
wek-tec International UG (haftungsbeschränkt)
offer the same products and services, one for domestic
and another for out of Germany customers:

- R&D and pilot systems with intense pulsed light from UV to IR spectra,
- intense Pulsed Electrical Fields (PEF or corona plasma),
- high pulsed magnetic systems for applications from sterilization to material modifications,
- R&D and small production systems for sanitation of homogeneous powders,

Dr. Alexander Wekhof is a recognized expert in intense pulsed UV, EMF, e/ion beams, plasma, thermo-dynamic systems, interactions of PL, EMF, plasma and e-beams with bio or material objects, his publications are known and referred.

More on products see at <http://www.wek-tec.de/wt-systems.htm> . Through past two decades we sold many dozens of our systems worldwide some of which work till now even for over a decade without repairs or maintenance and were referenced in many scientific & industrial publications worldwide as well.

- for construction of these systems we use a vast network of established suppliers and full and/or part time techs for the systems assembly and test runs with a vendor CE. Our facilities include offices and technical rooms plus an assembly hall, fully equipped with working tools instrumentation.

Working terms include the University of Ca. in Berkeley (LBL), Intel and National Semiconductor in the Silicon Valley, Ca.

- systems evaluation to customer specs at local certified labs and to service systems by SteriBeam without taking over their past obligations.

Customers benefit from his contacts and experiences.

Both companies are proprietorships registered on Dr. Alexander Wekhof at Freiburg: <http://www.wek-tec.de/impressum.htm> at the same address in the Lake Konstanz area between Singen (De) and Schaffhausen (CH) on B34. Both continue improving and expanding prior businesses by Dr. Wekhof (SteriBeam Systems GmbH and UVERG Inc. in California) after his relocation from California to Germany. Our achievements are reflected in part below and in more details in <http://www.wek-tec.de/wt-info.htm> .
