

## Technical Applications:

surface cleaning,  
surface modifications,  
old paint removal from Aluminum (aircraft)  
surfaces. It was developed back in early  
1980 's in California by Maxwell  
Laboratories, Inc.

## Defense Pulsed IR Pilots:

Versions to carry and to mount at  
homes. Info is only on a confidential  
request.

## Bio-Medical:

R&D in to IR-acoustic vision cameras for  
non-invasive observation inside tissues.  
This was under R&D in Holland in 2010 's,  
see the link on the same page.

Therapeutic usage for specific parts of  
bodies (a knee, etc), instead of continuously  
emitting IR sources.

Details are on request.

On custom orders for R&D projects.

## Intense Pulsed Filtered UV for up to 6 logs sterilization

the most UV and gamma resistant  
micro-organisms (B. Pumilos, Listeria,  
etc) to be used to fully sterilize air and  
surfaces in hospitals, offices etc.:

Brochure is only on a confidential  
request.

Patent application with pilots can be prepared for an interested investor,  
an industrial or an academic partner.

Details are on request
